The third platoon consisted of the metallurgers. Five hundred men worked in three teams. The Commander was Lt. KARINSKI. There was no assistant commander.

The fourth platoon consisted of 500 metal diggers also. They too, worked in three teams. The Commander was Lt. MINADV and the assistant commander was Sergeant Major M/REV.

BUHOVO: There are 6 mines in operation near BUHOVO. No. 1, 2, 3, 4, 5, and 6 are 15-20 kms. north of BUHOVO, at the outskirts of the Koca Mountains.

Mines no. 7 and 8 are about 10 kms. northwest of BUHOVO, in the village of SESLAVTSI.

In June 50 a new mine was opened, 7-8 kms. northwest of BUHOVO which was named by 1.

Six Trudyak companies work in BUHOVO. Their location are:

At the factory in BUHOVO, 4 teams, of about 2000 men.
Secret name GOTEN, at the No. 3 and 6 mines, 1150 men.
Occupied in repairing and building roads, 150 men.
Commander, 1st Lt. GERMANOV.
Secret name BROVININ, at no. 7 and 8 mines in SESLAVTSI, about 6000 men.
At the new "May 1" mines, about 150 men. Commander, Lt. MANCHEV.
At the No. 1, 2, 3, 4 mines and at the same time drilling works. About 300 men, Commander, 1st Lt. DREHAROV, Assistant commander, 1st Lt. ZVESDOV.

The no. 3 and 6 mines in which we worked produced 70 trucks of metal every day. The trucks loaded tons each. other mines produce less.

The metal produced in BUHOVO is a heavy brownish-black colored metal. but it is used to produce atomic energy and the metal is being sent to Russia. Before being sent to Russia, the metal goes to a factory 1-2 kms. east of BUHOVO.

The metal that arrives first passes through a mill where acid is poured on it. After this treatment, 500-1000 grams of metal remain from 1 ton.
